DETAILED ACTION

Information Disclosure Statement

1. The reference cited in the information disclosure statement (IDS) have been considered by the examiner.

Drawings

2. This application, filed under former 37 CFR 1.60, lacks formal drawings. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings. In unusual circumstances, the formal drawings from the abandoned parent application may be transferred by the grant of a petition under 37 CFR 1.182.

Specification

3. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 4, 7 – 9, 12 – 14 and 17 – 19 are rejected under 35 U.S.C. 102(e) as being anticipated by WO 01/15449 A1 issued to Franck Vamparys ("Vamparys").

With respect to claim 1, 7, 12 and 17, Vamparys teaches an explicit user profile containing user-specific ratings for a plurality of attributes (page 5, lines 11 – 15), wherein a user provides rating values for only a subset of the plurality of attributes during initialization of the explicit user profile (page 9, lines 8 – 11);

a recommender system employing the explicit user profile in evaluating each of a plurality of search items (page 5, lines 22 – 23); and

a controller enabling the user, while viewing information regarding an item subject to evaluation by the recommender system after initialization of the explicit user profile, to manipulate ratings values for each of the plurality of attributes associated with the item (page 11, lines 3 – 15).

As to claims 2, 8, 13 and 18, the user provides rating values during initialization of the explicit user profile for only: one or more supersets of attributes within the plurality of attributes; or one or more attributes having possible values defining a scope of all search items (see Figure 2).

As to claim 3, rating values are included within the explicit user profile based on a content consumption history for the user (page 5, lines 19 – 22).

As to claims 4, 9, 14 and 19, the recommender system employs current values within the explicit user profile in evaluating each of the plurality of search items during a search (page 5, lines 19-23).

Allowable Subject Matter

5. Claims 5, 6, 10, 11, 15, 16, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
